Professional Summary

Java and Python engineer who owns production systems end to end — code, deployments, and service health. As founder of a live platform I am the first technical responder for issues, diagnosing and resolving incidents with urgency and precision. I work autonomously with high accountability, use AI tooling to accelerate cross-language work and issue resolution, and communicate clearly with users in fluent English.

Experience

Gakvetili	Tbilisi, Georgia
Founder & Tech Lead	2024 – Present
- Own a production platform end to end — code, deployments, and service-health monitoring — built with Java and Spring Boot on AWS. - Act as the first technical responder for user-facing issues, diagnosing and resolving production incidents quickly using CloudWatch and Sentry. - Operate autonomously with minimal process, making and standing behind architecture, deployment, and reliability decisions. - Serve as the direct technical point of contact for users, turning reported problems into fixes and clear communication.	
Quantori	Remote
Software Engineer	October 2025 – Present
- Build and support Python data-integration services, performing technical analysis of reported problems and debugging data flows across external platforms. - Leverage AI tooling to accelerate work across Java and Python codebases and speed up issue resolution. - Collaborate with engineers in a fully remote, global team to keep integrations healthy and reliable.	
EPAM Systems	Remote
Junior Java Developer	July 2024 – October 2024
Built and operated a serverless Java application on AWS (Lambda, API Gateway, DynamoDB, Cognito).	

Additional Experience

MZIURI – Programming Teacher	September 2023 – Present
Support 50+ students daily, diagnosing where they are stuck and explaining fixes clearly.	Remote

Technical Skills

- Languages:** Java, Python, JavaScript, SQL
- Production Ownership:** End-to-end service ownership, deployments, incident diagnosis & resolution, on-call-style first response
- Frameworks & APIs:** Spring Boot, FastAPI, REST APIs, microservices, integrations
- Cloud & Monitoring:** AWS, Docker, Kubernetes, CI/CD, CloudWatch, Sentry
- AI Tooling:** AI-assisted development for cross-language work and faster troubleshooting
- Databases & Tools:** PostgreSQL, MySQL, Redis, DynamoDB, Git, GitHub, GitLab

Education

Kutaisi International University	Kutaisi, Georgia
Bachelor of Computer Science	September 2022 – Expected July 2026
